

Earth Day

Adventures With Pip the Pup

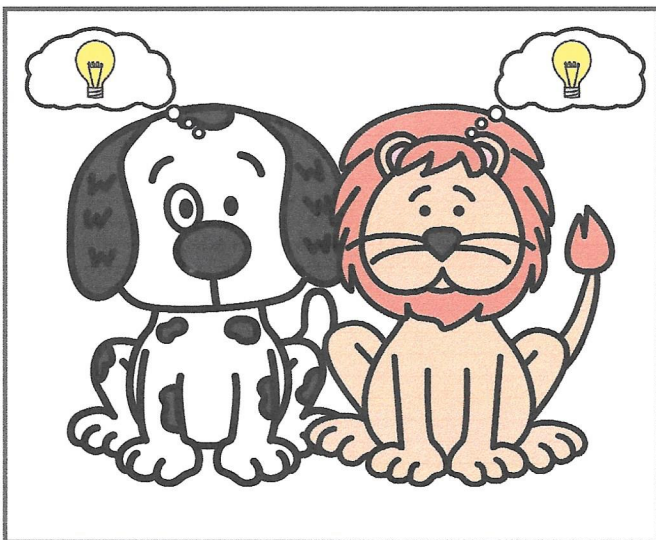

©Tara West

Pip the Pup's teacher said today they will be learning all about Earth Day. Her friends wonder what Earth Day is?

1 |

Earth Day is April 22nd each year. On this day, we take time to think of all the ways we can care for the Earth.

On Earth Day, we talk about planting trees. When we plant trees, we help to limit pollution in the air.

What is pollution?
Pollution is chemicals that can float around in the air. We do not want pollution in the air.

We can also help with pollution if we walk to school. We can choose to ride our bikes or scooters, too.

On Earth Day, we help pick up trash. We can help keep our parks clean. We never throw trash on the ground.

When we throw away trash at home, we can choose to recycle. When we recycle, we are helping the Earth.

Instead of throwing something away, we can find ways to reuse the item. This helps the Earth.

Earth Day is just one day, but we should help protect the Earth every day of the year. How can you help?

Levi will help pick up trash off the ground when he sees it. Pip will help her mom recycle. Now it's your turn!

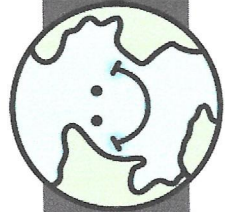

Earth Day Crown: The crowns can be printed on plain paper (allowing students an opportunity to color) or printed on colored printing paper. The crowns will be attached to sentence strips or 2 inch strips of paper. Trim and staple the strips to each child's head.

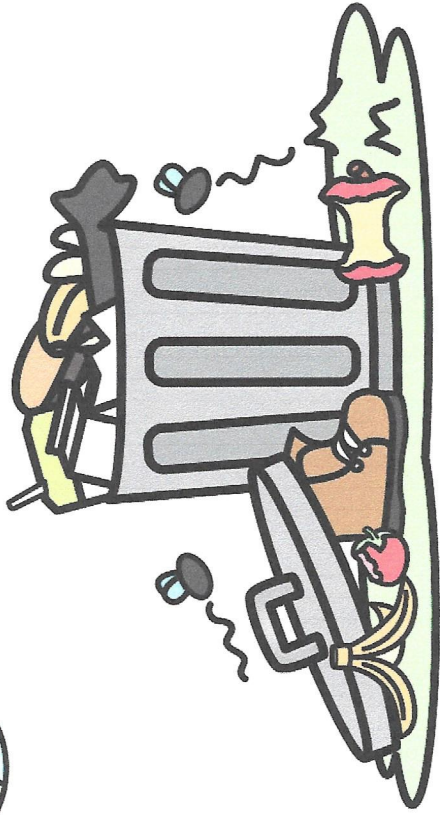

I make the
Earth Smile!
